Weight and Size of a Parcel

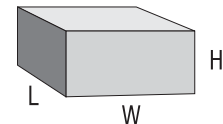

- Maximum weight - 31.5 kg
- Maximum width - 175 cm
- Grith = circumference plus length
(height x 2 + width x 2 + length) - max. 300 cm

Volume weight

Volumetric weight is relevant for light packages with large volume in case it exceeds the physical weight.

$$\text{Volume weight} = \frac{L \times W \times H}{6000}$$

L - Length in cm
W - Width in cm
H - Height in cm

In time with business.

** Indicated delivery times are in business days in country of origin, transit countries and country of destination (the average transit time to the main cities in the countries indicated). The delivery times indicated are not applicable to deliveries to islands and remote built-up areas, deliveries which are due to customs processing, with incomplete/invalid recipient address or which do not state the telephone number of the recipient, as well as to deliveries to private persons. For more detailed information on the transit time to a particular destination, please contact your local office.

*** If the country is a member of the European Union (EU), EU is marked opposite its name and 20% VAT is to be added to the price. For parcels out of the EU, a customs clearance fee and/or duties/taxes may apply for consignor or consignee.
